### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ryan W. Massey on March 30, 2006.

The application has been amended as follows:

Claim 20, line 1, before "partitioning", the phrase - - doorway or window- - has been inserted.

Claim 20, line 2, the phrase "a doorway" has been changed to - -the doorway- -.

Claim 20, line 8, after "portion", the phrase - -, the two longitudinal edge portions are perpendicular to the seam portions and are spaced apart by the body panel located therebetween, said edge portions are joined along opposite edges of the panel forming the doorway or window sealingly closing partitioning device panel - - has been added.

Claim 24, line 1, before "partitioning", the phrase - - doorway or window- - has been inserted.

Claim 24, line 2, the phrase "a doorway" has been changed to - -the doorway- -.

Claim 24, line 4, before "forming", the phrase - -, the sealing wall is sealed along its perimeter, opposite the sealing side, to the working wall perimeter - - has been inserted.

Art Unit: 1772

Claim 24, line 5, before “;”, the phrase - -, wherein said pre-sized panel includes an opening with a check valve for forcing a mass of air into said chamber, said panel forming the doorway or window sealingly closing partitioning device panel - -.

Claims 27-29 have been cancelled in view of the amendment to claim 24.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

A review of applicants' arguments made in amendment filed on January 23, 2006 and a review of the instant amended claims has convinced the examiner that the claims are allowable over the applied prior art of record. The prior art fails to teach a doorway or window partitioning device comprising a panel having a plurality of pre-sized body portions separated by seam portions having perforation along each of the seam portion as shown in figures 7 and 8), that each of the body portion includes a door opening having a hinge, an opening edge and a closing edge, wherein the opening and closing edges are provided with hook-and-loop type connector (as shown in figure-5). Further, the prior art also fails to teach a doorway or window portioning device comprising a panel having a sealing wall and a working wall that are joined along the perimeter forming a chamber therebetween, with a check valve for forcing a mass of air into said chamber (as shown in figure-4). Also, no evidentiary support could be provided to

support the position that the claimed invention would have been obvious over the prior art of record to one having ordinary skill in the art.

The closest prior art of Bentley (USP 4971130) relates to a body portion with a door opening but fails to teach a panel with a plurality of body portions separated by seams having perforations along said seams or a body portion with a check valve.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
